

OS-309

Features

The UV-309 keyboard is the key component that controls the speed dome system. There is a vari-speed vector rocking bar to control dome and global system. Users can control DVRs, decoders, Matrix for cameras and monitors, by keyboard. The user can control the camera's viewing range independently. It can control up to 256 PTZ cameras.

Other features included in the UV-309 Keyboard series include:

- Words and picture input mode, preset points, auto-cruise, dome vari-speed and alarm linkages.
- Display for the operating status of the main frame of matrix, keyboard and dome.
- Multigrade control and Remote-control of network series.
- Alarm and message alarms.
